Technical Information Sheet

“BuckFab”

Mil-C-882 / S1619

Preformed Fabric Pads

Multiple layers of 8 ounce square woven cotton impregnated with oil resistant neoprene. Often used as die press shock absorption pads, pads for pre stressed concrete beam on bridges, and parking structures. Designed to handle loads up to 10,000 pounds per square inch.

Material manufactured in 48" x 48" sheets but custom sizes are available.

Contact your BRP representative for other sheet sizes, large volume quotations.

Meets AASHTO requirements for fabric pads. Material is shipped untrimmed only.
